nov. 2009 / janv. 2010 **Senior Project Coordinator**
ThinkBank REMOTE
Managing a migration project, during a short leave of absence of the Project manager for a Documentum 5.3 to a 6.5 application. Main tasks during this project were budget planning, time management of all external resources and leading remote meetings

with end users and business representatives via SKYPE and MSMeetings. Amending the current plan to show infrastructural changes such as servers and DB's and to continue the negotiations for these. Prince2 methodologies were used in this project

avr. 2009 / oct. 2009	**Senior Project Officer**

Sanofi Aventis PARIS, FRANKFURT and REMOTE

Managing and analysing a redevelopment of a Documentum 5.3 to a 6.5 application for SA JXP critical documents, Main responsibilities during the project was to keep the project within the plan, budget and general performing other office related tasks. Analysing the current application and with the aid of UML and other MS Office application detail a thorough specification for the development team to implement. Utilising Prince2 (S.i.m.p.l.e.), ITIL, MSProjects for the Project Managing and other Office, third party applications fro the analysis part. Additional travel to other sites within the Sanofi Aventis and Sanofi Pasteur to host user meetings and gather future requirements both from an application standpoint and from an infrastructure point of view, these were then implemented once the steering committee had approved them. Applications used Skype, Visustin, Messenger, BPM, CAVAJ, TOAD, MSProjects, as the project was developed over three countries a precise resource schedule was made.

déc. 2008 / mars 2009	**Senior Project Manager / Chef De Projet Senior**

ThinkBank REMOTE

Managing a redevelopment of an Documentum 6.5 application (the client and developers were located remotely, the main client was situated in New Jersey, whilst the developers, and myself were located in Canada and Europe) Main responsibilities during this project were to keep within the project plan, budget and most importantly the requirements. A majority of the meetings were held over the internet using Skype, Messenger and the clients own network through Citrix. Main methodology used within this project was Prince2 and eXtrem, Tools used Skype, Messenger, Citrix, MSProjects, OpenProj and other Office applications, As well as Visustin for an overview of code written by each of the developer. The developers were situated all over the world from Canada to China so a concise resource plan was developed which allowed for time differences and resource specialties. Negotiation of contracts for the Hardware was also within my remit as well as the scheduling of the installation once the contracts and payments were confirmed. Prince2 methodologies were used in this project
